SUMMARY

During my bachelors degree in Multimedia Production at the University of Applied Sciences in Kiel I developed a passion for programming. Last september I started my extra-occupational masters programm in media and computer science at the University of Applied Sciences in Lübeck, to deepen my existing knowledge. I enjoy every step of production, from conceptual work over user experience design to developement. Other than Web-Development, I am comfortable working on mobile applications with Flutter. I take pride in being a team player and am an organisational talent.

WORK EXPERIENCE

Co-Founder & Software Developer

Explo | June 2021 - Current

Explo aims to satisfy Gen-Zs urge to explore by inspiring them with the best personalised recommendations for authentic local experiences through an engaging short-video format. My job at Explo includes, but is not limited to:

- Discussing strategic decisions for the business
- Setting company milestones and planning the product roadmap & vision
- Organizing the company documentation & project management for the product team in Notion
- Development of the Frontend-Application using Flutter
- Working with the designers to translate our vision into the final products feel

Web Developer

Freelance | March 2021 - August 2021

After I finished my bachelors degree I started working as a freelancer building websites using WordPress. This work included the following responsibilities:

- Self-organization and project management
- Communicating with clients about their specific requirements and needs for a given project
- Designing mockups and creating prototypes
- Developing custom themes and functionality fulfilling the aforementioned requirements

Service Technician

Smartphoniker GmbH | June 2017 - December 2020

Smartphoniker GmbH is a local mobile communications company from northern Germany, which focuses on sustainable solutions for individuals and institutions.

Attention to Detail
Creativity
Critical Thinking
Decision Making
Problem Solving
Working Independently

Technical

Flutter
Firebase
HTML & CSS (Sass)
PHP & WordPress
JavaScript
Notion
Hugo (Golang)
Google Analytics
Git (GitHub)
UI-Design (Figma, Adobe XD)

PROJECTS

mate

mobile application | March 2020 - December 2020

mate was a project two friends and I created as part of classes in university as well as in our spare time. The goal of mate was to combine several services for all of which students have to visit separate badly optimized websites in a well designed and user-friendly mobile app for iOS and Android. My contributions included, but weren't limited to:

- Frontend-Development of the MVP using Flutter
- Backend-Development with Firebase Firestore, Firebase Functions and Google Cloud functions using Python and Node.js

OTHER

Hobbies / Interests

football (soccer), fitness, technology, boulder, self-improvement, programming, interior design

Languages

German (mother tongue), English (fluent)
